

FP measuring and marking posts

Plastic PMMA posts

The usual high quality combined with optimum material properties, safety, stability, as well as user-friendliness, also applies to the measuring and marking posts with PMMA-coating.

Posts

- of weather-resistant high-quality plastic material
- high impact strength through ABS
- non-fading and UV-resistant through co-extruded PMMA-coating
- scratch-resistant surface
- completely detachable top for optimum accessibility for mounting and measurements
- stable lock for protection against unauthorised persons
- individual packaging in foil

Anchoring

FP Marking and measuring posts with rod-type ground anchor and spread feet as a special design.

Signboard mounting

is performed on the flattened top by means of backing plate and subsequent snap-in of FP marker plate.

Aerial line markers

- the round aerial line marker of high-quality plastic Luran S, robust and non-fading
- the powder-coated aluminium top in roof-shaped design, stable and corrosion-resistant
